CrossWind
Machining, Inc.

- ISO 9001:2000
- AS9100B:2004/ISO
- FDA Registered

"Our quality and service speak for themselves, give us a call and let us show you some of the highest quality machined products available on the market today."

- Chuck & Judy Smith, Owners

Because of his extensive machining knowledge, Chuck has also worked as a consultant to OEM manufacturers desiring better cost structures, yet maintaining quality in their product design. On several occasions, this has resulted in overall cost reduction of their product.

With over 30 years experience ranging from Aerospace & Ordnance to Medical Device manufacturing, CrossWind brings a wealth of skill and knowledge to the table.

Why should I choose CrossWind Machining?

**We specialize in
high precision
machined products.**

- **CrossWind Machining, Inc. specializes in both prototype and long production run, high precision machined products.** Our screw machines are computer controlled, state of the art equipment.
- **CrossWind has developed a network of relationships within the machining industry.** We are known for our ability to help solve some of our customers' most complex of challenges while maintaining the high quality of precision required.
- **Personalized Customer Service:** Because we are a small business, we make sure that we take the time to determine your specific needs. Our promise to you is that we will partner with you the customer, to make sure that we produce the best possible product available.
- **We want to help you reach your goals.** CrossWind believes that our customer's best interests are what drive our business.
- **Thirty years of machining experience** combined with the latest technology available make a winning combination for you.
- **We take pride in our product** and in the CrossWind name. Our number one priority is to consistently meet or exceed our customers' expectations.

CrossWind Machining, Inc. is:

- ISO 9001:2000
- AS9100B:2004/ISO
- Small Business Certified
- FDA Registered
- Woman Owned
- Native American Owned
- GMP Compliant

Facilities List:

- (2000) Star SE-12 CNC Screw Machine
- (2001) Star SR-20R CNC Screw Machine 6 axis with sub-spindle
- (2003) Star SR-20R Type II CNC Screw Machine 7 axis with sub-spindle
- (2006) Star SR-10J CNC Screw Machine 6 axis with sub-spindle and Tryton Bar Loader
- Hardinge Second-Op
- Live Tooling on Screw Machines
- Hydraulic Bar Feeds on CNC Turning Machines

A variety of materials including: ABS, BeCu, Brass, Copper, Delrin, Nylon, Polycarb & SST

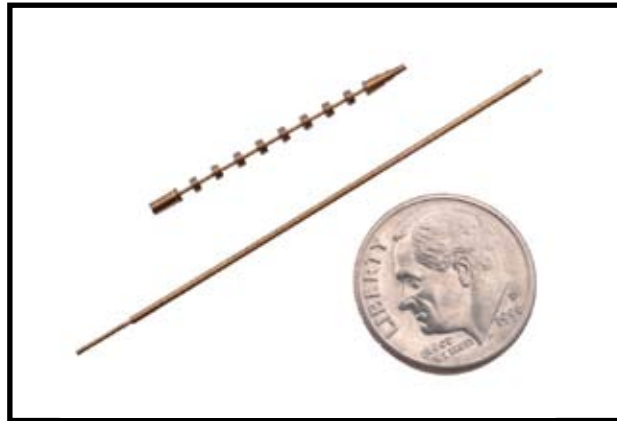

Complex milling on microcomponents

Automated material loading

Titanium bone screws

Fragile close tolerance parts

FDA Registered; GMP Compliant

C-Axis machining and circular threading

CNC milling, large and small components

Latest technology equipment
